Authorization for this examiner's amendment was given in a telephone interview with Indranil Chowdhury on June 15, 2004.

The application has been amended as follows:

Claim 16, line 7 delete --identifying--.

Claim 16, line 9 replace --evaluate intersection-- with --evaluate the intersection--.

Claim 22, line 6 replace --evaluate intersection-- with --evaluate the intersection--.

This application is in condition for allowance except for the presence of claims 1 to 15 and 24 that were non-elected without traverse in Paper No. 5. Accordingly, claims 1-15 and 24 are cancelled.

***Allowable Subject Matter***

Claims 16-23 are deemed allowable over the prior art of record, the reasons for allowance are as follows:

In regards to claim 16, the prior art of record does not disclose nor fairly suggest an image processing apparatus, comprising a digital signal processor for processing a sequence of image frames collectively forming a motion picture, wherein the digital signal processor is arranged to determine a vertical alignment axis for each frame of the sequence from an analysis of the data content of that frame, wherein the analysis includes the digital signal processor

Art Unit: 2615

arranged to identify perpendicular lines between data objects in the frame and evaluate the intersection of the perpendicular lines to determine the vertical alignment axis in the frame, apply a rotational transform to each frame to map the vertical alignment axis determined by the analysis onto a fixed alignment axis of the frame and output the sequence of images thus transformed to compensate for vertical misalignment of the data content of the frames.

Examiner notes that while it is known to determine a vertical alignment axis from analyzing content within an image frame, as disclosed by USPN 5,227,889 to Yoneyama et al., a comprehensive search of the prior art has failed to provide teaching to identify perpendicular lines between data objects in the frame and evaluate the intersection of the perpendicular lines to determine the vertical alignment axis in the frame.

Claims 17-21 depend from claim 16.

The reasons for allowance for claim 22 is substantially similar to that for claim 16.

Claim 23 depends from claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian C. Genco who can be reached by phone at 703-305-7881 or by fax at 703-746-8325. The examiner can normally be reached on Monday thru Friday 8:30am to 4:30 pm.
